to the Internet has to have its own unique Internet Protocol (IP) address. Think of an IP address as a phone number that websites and devices use to communicate with each other.

IPv6: Internet Protocol Version 6 - AT&T Support

There may be 2 different issues

Access Free At T Position On Ipv6

happening. The first with the gateway not assigning IPv4 addresses. Try testing with multiple devices over Ethernet if possible. If you haven't tried already, do a software reset. Hopefully, that fixes the IPv4 assignment. For IPv6 DNS issues, try testing with Google's DNS to see if that fixes it.
