For the mono input channels, the PMH880S has a PAN (ORAMA) control which determines the position of the channel signal in the stereo main mix. The PMH660M has no PAN on the input channels, because it is a dual-mono power mixer. The BAL (ANCE) control for the stereo channels of the PMH880S corresponds to the PAN control for the mono channels. It determines the relative volume of the left and right input signals before they are routed to the stereo main output.
