Mildred Blaxter obituary | Health | The Guardian

Blaxter guides students through all the relevant conceptual models of the relationship of health to the structure of society, from inequality in health to the ideas of the risk society, the 'socio-biological translation' and the contribution of health to social capital. The book concludes with a comprehensively revised and thought-provoking discussion of the impact of new technology, the boundaries between life and death, modern commodification of health, technological transformations of the ...

This seems to suggest that the prior effect on health is the general lifestyle associated with economic or occupational position. Only in the more favourable circumstances is there 'room' for considerable damage or improvement by the adoption of voluntary health-related habits. Blaxter, Mildred, Health and lifestyles. London (Routledge), 1990, 233
