The total amount of wedge required depends on track size & roll couple in the car. A setup that will spin it's tires easily will require more wedge to counter act the traction loss under power. A setup with a higher gear ratio or one that does not spin the tires will require less wedge. Wedge is required to get through the corners.

The "ULTIMATE" Racing Car Chassis Setup Guide and Tutorial
Thanks to Devan Lockridge for sharing this iRacing Midget qualifying setup for Eldora Speedway 2018 Season 3. I'm not too familiar with the Midget, but if it's like other Sprint Cars, you should be able to add a little fuel and decrease the cross weight a little and have something pretty close for the race.
