Student Workbook Options

Prior to 1990, the performance of a student in precalculus at the Univer-sity of Washington was not a predictor of success in calculus. For this reason, the mathematics department set out to create a new course with a specific set of goals in mind: • A review of the essential mathematics needed to succeed in calculus.

Practice Problem: Write the first five terms in the sequence . Solution: Remember that we are assuming the index n starts at 1. Thus, the first term corresponds to $n = 1$, the second to $n = 2$, and so on. The terms are then . Introduction to Series . Series are similar to sequences, except they add terms instead of listing them as separate elements. A series has the following form.
