In the future, the controllers or nurturers (parents, teachers, coaches, military leaders, politicians, bosses, etc.) will have an evidenced-based science of human behavior to change people in positive ways. Effective checks can also be developed to control the new science of human behavior as B.F. Skinner recommends.

Abstract. Skinner's Science and Human Behavior marked a transition from a treatment of behavior that took physics as its reference science to one that emphasized behavior as a fundamental part of the subject matter of biology. The book includes what may be Skinner's earliest statement about the similarity of operant selection to Darwinian natural selection in phylogeny.

of science in the field of human affairs, we must assume that behavior is lawful and determined. We must expect to discover that what a man does is the result of specifiable conditions and that once these conditions have been discovered, we can anticipate and to some extent determine his actions. This possibility is offensive to many people.

B. F. Skinner's *Science and Human Behavior* (1953) became the main source of my understanding of behavior during my first semester as a college professor in 1955 at Kansas University. It has continued to exert a major influence throughout my career as the basis for a completely deterministic science of behavior, as a

### **Science and Human Behavior: a tutorial in behavior analysis.**

The assumption that behavior is a lawful scientific datum sometimes meets with another objection. Science is concerned with the general, but the behavior of the individual is necessarily unique. The "case history" has a richness and flavor which are in decided contrast with general principles.
