Test: Run engine at medium speed. Pull one plug wire and see if engine stops. If it keeps running put that wire back and pull the other plug wire. If it stops there is a problem with the ignition on that side. Test for a spark by putting a screwdriver in the spark plug wire cap. Hold a portion of the screwdriver near a ground, crank the engine.

SERVICE MANUAL - Subaru Industrial Power

1. The Robin-Subaru 9 HP This engine lands at Number 1 because it s actually is worse than the engine it replaced. Now, the name Subaru instills quality and dependability but I believe the engine may have too much Robin in it. Among its many problems are head gasket issues, warped head, and bad timing chains. The price is great on these engines, but the money saved is nothing compared to the frustration it can cause.
